VISION

To become the leading M&E contractor recognized for outstanding outcomes.

Mission

To consistently deliver high-quality services that exceed customer expectations.

Guiding Principle

Our Success is the satisfaction and trust that our customers and suppliers place on us.

Our Value

To provide tailored engineering solutions that add value to our customer's projects.

We, the Solution

VALUES

Teamwork

- Strive to attract, develop, and retain the best professionals in the field.
- We treat customers and all individuals with the highest degree of dignity, equality, and trust.

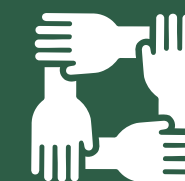

Respect

Support our employees enabling them to excel in their roles to meet our common goals.

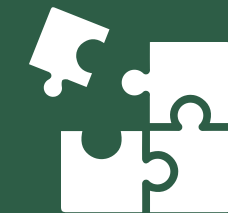

Accountability

acknowledge and take responsibility promptly once detected to prevent errors from reoccurring.

Integrity

uphold strong moral and ethical code in carrying out our services

Innovation

embrace and stay ahead of technological advancements by investing in cutting-edge tools and equipment to enhance our capabilities and offer state-of-the-art solutions to our customers.

ABOUT US

WS Powergrid Sdn Bhd (200101017350) is the leading M&E contractor in providing top-tier facility maintenance services to meet the complex and evolving needs of our customers. We have over 20 years of experience and are firmly established as a trusted company among our customers.

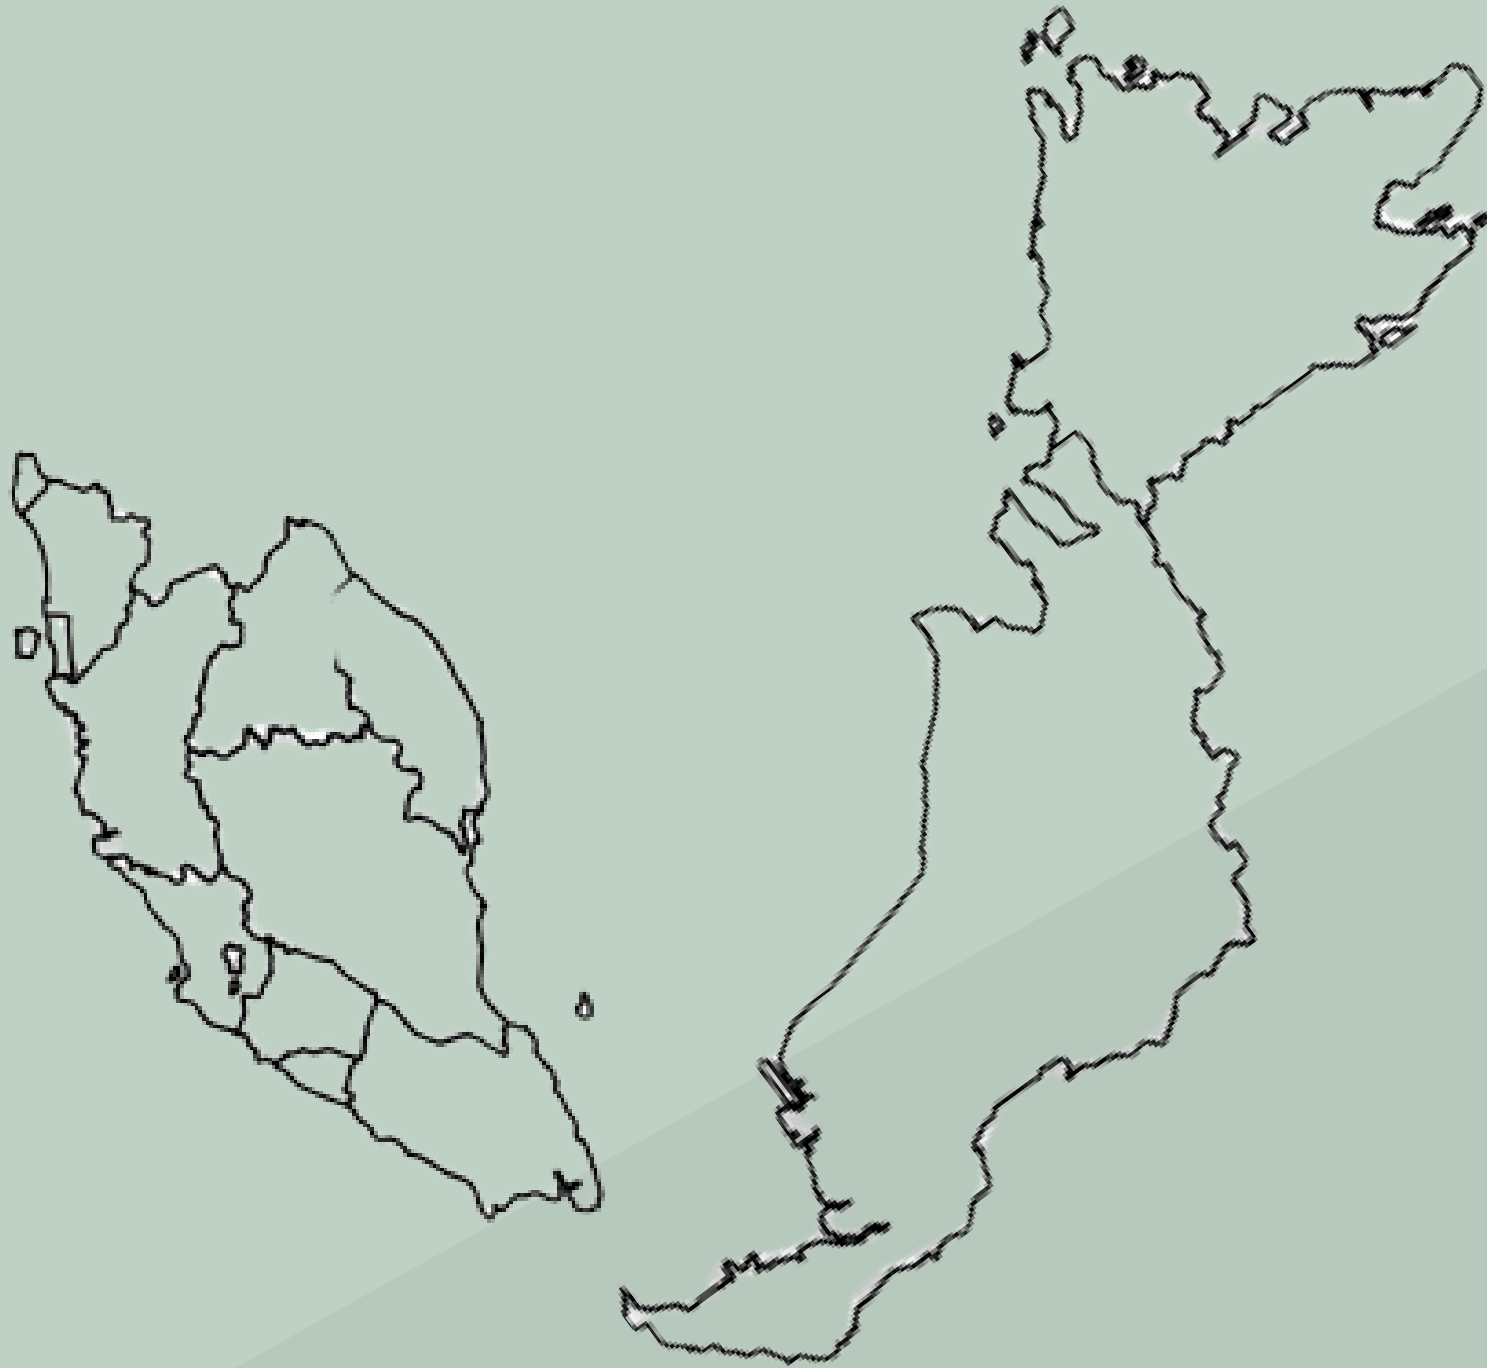

With a proven track record, we specialize in a wide range of expertise from various power network systems to cooling systems. Our team, being the backbone of our success, is comprised of experienced and highly skilled engineers and competent technicians to stay at the forefront of the industry.

NATIONAL PRESENCE

With a national presence all around Malaysia, we are advantageously equipped with the infrastructure to ensure customers are served with comprehensive solutions at every corner of the nation, regardless of the facility's size and complexity.

We are currently responsible for over 1 500 maintenance sites throughout Peninsula and East Malaysia, all of which are where our competent technicians are located. Due to our extensive national presence, we can provide services wherever and whenever needed, ensuring consistency and reliability.

Our customers' success is our top priority to ensure that their unique needs are met and deliver solutions tailored to their goals while implementing strict quality control measures that will guarantee excellence.

OUR PRODUCT

Renewable Energy PV

Uninterruptible Power Supply

Power Generation

Data Center Cooling System

DC Power System

RENEWABLE ENERGY

Empowering societies with stable power supply through clean energy resources.

Energy providers and consumers need more than ‘demonstration’ or ‘experimental’ energy storage systems. They benefit far more from economically and operationally proven equipment they can rely on for years to come.

We currently providing Energy Storage System to the national security facilities in ESSZONE.

- **Safe**
- **Economical**
- **Reliable**
- **Customizable**

UNINTERRUPTIBLE POWER SUPPLY

Clean, reliable and energy efficient power

Our Next Generation UPS has the ability to fulfill your network power requirements to protect your highly sensitive IT infrastructure to keep your business going at full speed. From protection from laptops to high-availability facilities -and everything in between- WS is the partner you can count on!

- **High Frequency and Double Conversion On-Line Technology**
- **Advance Power Factor Correction (PFC) Technology**
- **Energy Power Off (EPO) Function**
- **Fully Digitize Microprocessor Control**

DATA CENTER COOLING SYSTEM

Cooling system improves data center efficiency and protection

Cooling system is crucial to achieve the highest levels of equipment reliability and performance efficiency, it is important to remember that the reliability and cost effectiveness of any cooling system is largely dependent upon proper service and maintenance. High sensitivity of electronic components in that temperature, humidity, air movement and air cleanliness must be kept consistent and within specific limits.

- **Precision Cooling Systems**
- **Efficient, Precise, Reliable Control of Room Temperature**
- **Humidity and Airflow with proper operation of critical electronic equipment**
- **Optimal Data Center design specifically for Server Room**

DC POWER SYSTEM

The power you can count on

You need power you can count on and our DC power solutions deliver. Long known for reliability in telecommunications networks, DC power is also providing to be a viable alternative for IT networks. Our DC power solutions offer both efficient power protection with unit-level redundancy and easy connectivity with renewable energy sources.

We currently providing DC Power System to the national security facilities in more than 80 sites nationwide.

OUR SERVICES

MAINTENANCE SERVICES

Preventive and Corrective Maintenance

WS provides premier electrical contracting and maintenance for public sectors and private customers in commercial, domestic and industrial markets throughout nation. Our Maintenance Services team are highly skilled trades professionals and management staff who maintain utilities and buildings for the public and private sector. We provide quality service in an efficient and professional manner to ensure building safety and comfort. We implement continuous improvement to ensure the highest level of customer satisfaction.

- ✓ BUILDING & FACILITIES MAINTENANCE SERVICES
- ✓ ELECTRICAL RELATED MAINTENANCE SERVICES
- ✓ MECHANICAL RELATED MAINTENANCE SERVICES
- ✓ CIVIL RELATED MAINTENANCE SERVICES
- ✓ SECURITY RELATED MAINTENANCE SERVICES
- ✓ MONITORING SYSTEM MAINTENANCE SERVICES

- Air Conditioning System
- Generator Sets
- Low Voltage Switch Board
- Uninterruptible Power Supply
- Fire Prevention/Supression System
- Solar Hybrid System
- DC Power System
- Data Centre & Centralized Cooling System
- Electrical Fencing
- Video Wall System
- Security Surveillance System
- Electrical Inspection & Assessment

MAINTENANCE SERVICES

Preventive and Corrective Maintenance

We managed to monitor and control all of our Contract Maintenance using :

- **Fault Management System**
- **Spare Management**
- **Tools Management**
- **Vehicle Monitoring System**
- **Monitoring Center**
- **Regional Performance Monitoring**
